## Your Raw Material for a better World tomorrow

PolyGreen Chemicals was founded in year 2006, with the vision to explore and expand the potential for natural based Bio-Polyols for foams and non-foam polyurethane application.

The focus has always been to develop a natural, sustainable and competitive product range based on Plant-based oils with minimal impact on the environment in terms of waste, carbon balance and energy consumption as an alternative to synthetic polyols.

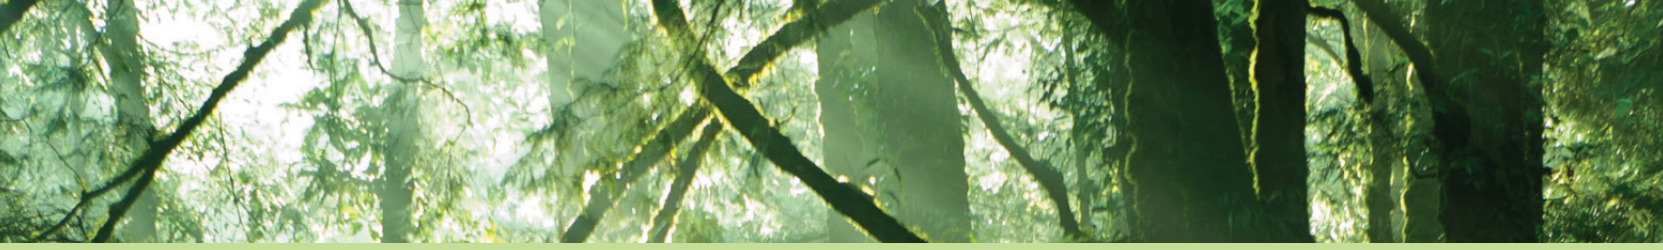

PolyGreen has built up an expertise in formulation work for Polyurethane applications and gained a wide customer base throughout Asia.

PolyGreen's Bio-Polyols are Europe REACH compliant and USA TSCA accepted, as well as registered under the USDA BioPreferred Program.

We offer our customers

- An independent alternative to the traditional synthetic raw material route
- A long-term competitive and natural product range, that is independent from crude oil price developments
- Support of sustainability goals of our customers with low carbon balance based raw materials
- Our Product Application Division to support the integration of natural raw materials into product formulations
- Shipments in drums, intermediate bulk storage (IBCs), Flexibags, ISO tanks and bulk from strategically located Malaysia
- A superb Biodegradability up to 99%, which offers a unique differentiation from Synthetic Polyols
